

LCMLA – SRT – Safety cord attachment (hand ascender to SRT harness)

2 possible OPTIONS if using Triact type or Screw-gate delta + minimum rope specification

A

Attachment - A

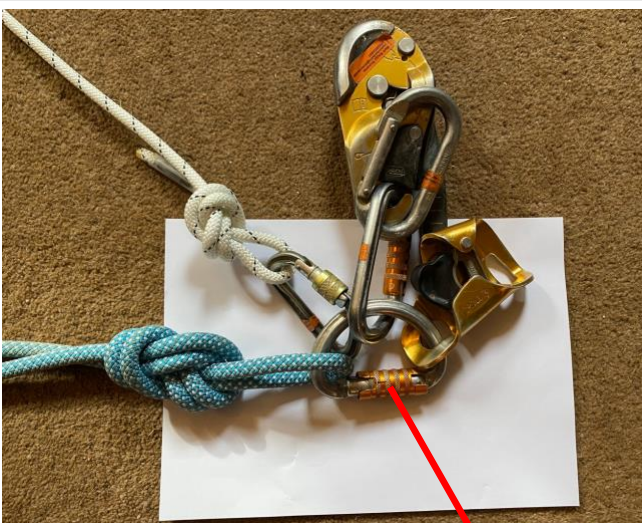

- Minimum of 8mm semi static rope or 8mm dynamic rope
- Not accessory cord

A = safety attachment connected to hand ascender

Above – Attached direct with overhand knot

- Below – Attached with small rated screw gate allowing it to be taken off when not required
- Yes it adds more bulk to central attachment point, but gives more quicker flexibility

B = Do not attach safety attachment to bottom if your using a twistlock / triact or screwgate as your central delta

B

Built in attachment such as Petzl Falcon Tie in direct of use rated mallion rapide or small screw-gate
